

NOTICE OF WATER LEAK DETECTION SURVEY

Beginning Tuesday, April 15, 2025, the Lawrence Water Department's leak detection of hydrants, water services, and valves/curb boxes will begin. Faith Leak Detection personnel will be conducting Phase 1 of this leak detection survey throughout the Town in the Hemlock Creek area (including properties along Williams Grant), Autumn Heights, and Autumn Fields Condominium Subdivisions. (see map below). Faith Leak Detection will be using sensitive listening devices to determine if leaks are occurring on hydrants, water services, and valves/curb boxes.

The Town's Water Department will be preparing for this by placing blue flags near the curb boxes as well as painting the curb boxes in each of the properties in the subdivisions listed above starting Thursday, April 10, 2025. Please do not remove these flags until the leak detection survey has been completed.

We anticipate this project to be completed by **FRIDAY, MAY 9, 2025**

No interruption of water, loss of water pressure, or discoloration of water will occur during this.

The properties highlighted in blue will be part of the leak detection survey.

Please call the Water Department at 920-336-9131 with questions.
